

students stress about schooling
don't relieve it:
• school work in students causes stress, they don't know how to release that stress or even not have / cause them stress

mindfulness can be nice = less stress.
• relaxation is a way to relieve stress and students don't use their meditations that to have mindfulness

Phenomenon Draft:

• mindfulness and time access to nature can help students be less stressed

→ walking to class around nature:
• the plants, trees, flowers, no one stops and looks at the nature they are surrounded by.

LENS #1

LENS #2

LENS #3

QUESTIONS:

• what ways can students use nature as a relaxation technique?

• from being so stressed, how can students get to a mindful state?
